		Page: 1 / 2

As TRX, we guarantee the scope of construction, sales, marketing and project management of new shipbuilding ships;

- To set measurable targets to minimize our environmental impacts,
- To ensure the continuous development of our environmental management system by periodically evaluating these targets in line with the determined targets,
- To ensure the recycling of wastes originating from our facility as much as possible,
- To raise awareness of all our employees and business partners about the environment,
- To follow our scrap and waste rates and to reduce them,
- To take measures to reduce resource use,
- To continuously improve the environmental knowledge and awareness of our employees through training activities,
- To use renewable energy in every possible field within our shipyard activities,
- To meet the requirements of national and international laws, relevant standards and obligations on the environment.
