As TRX, we guarantee the scope of construction, sales, marketing and project management of new shipbuilding ships;

- To increase the satisfaction and loyalty of our employees,
- To keep the quality at the highest level with a quality control system with clear, simple and measurable criteria,
- Adopting the zero-accident principle in safety, health and environment issues,
- To work around the relevant local, national and international laws and requirements in order to achieve the zero-accident target and to meet these conditions,
- To increase the effectiveness and efficiency of the quality management system by reviewing our processes and targets within the scope of continuous improvement activities,
- To support their development in a sustainable and trust-based cooperation with our suppliers,
- To provide customer satisfaction above their expectations,
- To fulfil other conditions that we undertake to be applicable together with our legal responsibilities.
